

Web Design

Course Numbers: TECH743

Grades: 9th - 12th

Instructor: Denny Nkemontoh

Web Design is an introductory web design course where students will learn what makes a web site useful and attractive, and put that information into practice by developing a web site for a client. Students will primarily use non-html editing tools. They will, however, learn to tweak html; work with images, tables, colors; develop cascading style sheets; and learn about online ethics as they relate to their web projects.

Required Materials: None
