

1. Define each of the following terms and explain the differences between terms in the same row:

<p><i>Atom</i> blah blah            blah blah blah            like one lego</p>	<p><i>Molecule</i> blee blee            blee blee blee            like 2+ legos            stuck together</p>	<p><i>Difference:</i>            molecules are  <u>made from</u>            atoms</p>
<p><i>Covalent Bond</i>              like sticking legos            together using 2 <u>dots</u></p>	<p><i>Ionic Bond</i> like magnetic            legos - stuck            together              because            opposite            in charge</p>	<p><i>Difference:</i>            molecules are            made from            covalent bonds</p>
<p><i>Molecule</i></p>	<p><i>Compound</i></p>	<p><i>Difference:</i></p>
