

Understanding Differences in Giftedness

Tuesday, February 23rd

7-8pm

Linus Pauling Middle School

**Presented by Judy Smith of the Oregon
Association for Talented & Gifted
(OATAG)**

All children are unique, but gifted children have some characteristics that set them apart from others in their age group and from each other. This presentation will include information about asynchronous development and how that affects the child's experiences, especially emotional growth and social interactions.

Judy Smith is a parent and grandparent with experience as a facilitator of Supporting Emotional Needs of the Gifted (SENG) model parent groups. She is currently the Parent Meet-up Coordinator for OATAG.

Brought to you by the TAG Parent Advisory Committee.
