

5 TIPS FOR CREATING AN AT-HOME WORKSPACE

1

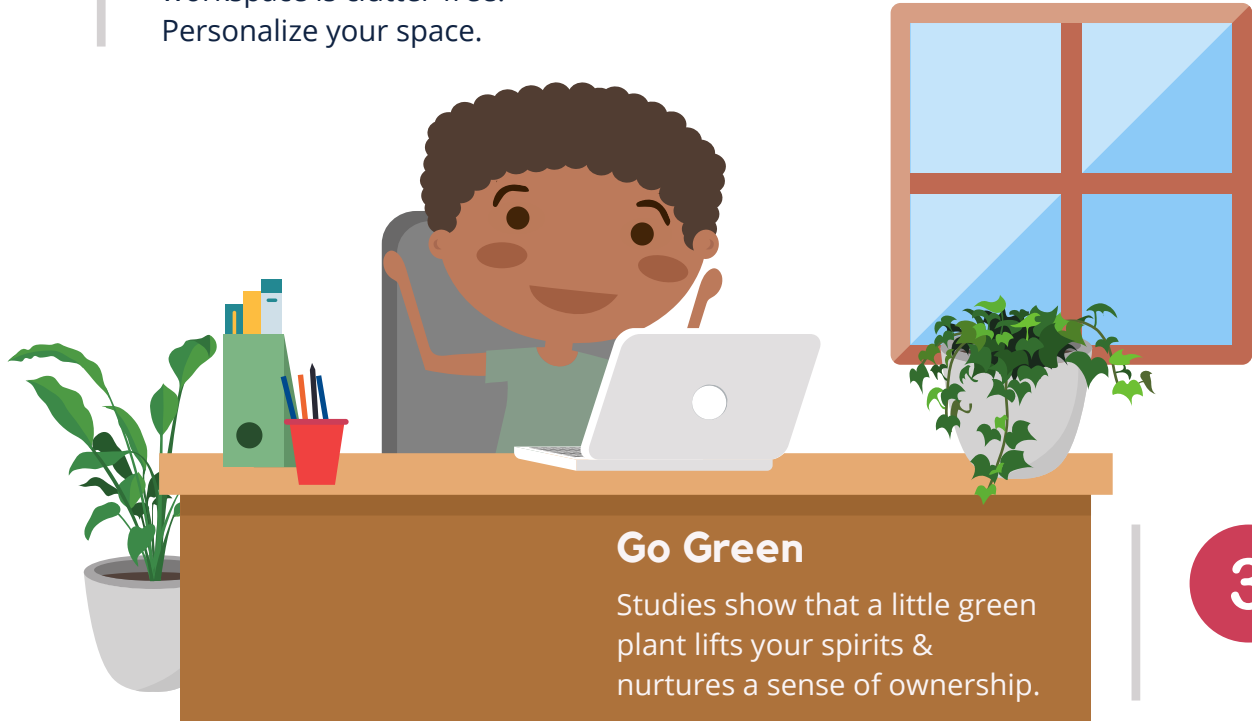

Be Organized

Keep your school supplies in the same spot. Use cans or organizers so your workspace is clutter-free. Personalize your space.

2

Lighten Up

Your workspace should be well lit. If you can, set up near a window to take advantage of natural light.

Go Green

Studies show that a little green plant lifts your spirits & nurtures a sense of ownership.

3

5

Be Supported

Place your computer on a **flat surface** rather than directly on your lap. Use a desk, table, lap desk, or small piece of wood or stiff cardboard.

4

Get Comfy

Make sure the place where you're sitting is comfortable yet supportive. Some kids prefer to work on the floor or in a bean bag chair. That's ok, too!
