

COVID-19 Staff Health Screening Overview

Updated September 7, 2021

Symptoms (may appear 2-14 days after exposure)

- Cough
- Temperature of 100.4° or greater
- Chills
- Shortness of breath
- Difficulty breathing
- New loss of taste or smell
- Fatigue
- Muscle or body aches
- Headache
- Sore throat
- Nasal congestion or runny nose
- Nausea or vomiting
- Diarrhea

Staff will receive a daily Safety iPass email with the following screening questions:

- Are you experiencing any of the COVID-19 symptoms?
- Have you tested positive for COVID-19 within the last 10 days?
- Are you waiting for test results due to COVID-19 symptoms?
- Have you been recommended to quarantine due to exposure?

If you are not feeling well, we hope you feel better soon!

Here are instructions for what to do next

1

STAY HOME

If you are not already at home, avoid contact with others and go straight home immediately.

If in doubt, stay home until you have spoken with someone from the Nursing Department.

2

CALL

If you have had close contact with someone with a confirmed or presumptive case and are unvaccinated or you display symptoms of COVID-19, you are encouraged to contact your primary care physician.

If you do not have a primary care provider, please contact the CSD Nurses COVID Hotline at 971-301-4393 for confidential assistance.

3

CONTACT

Contact your building administrator. You will be contacted by the Nursing Department to discuss how long you need to stay home.

If you have a positive test, you may also be contacted by your local health department for contact tracing purposes.
